

Special Issue on Fiber Materials

Call for Papers

Fiber Materials are refers to natural or synthetic filament that usually pliable and capable of being spun into a yarn. They are playing a major role in many branches of industry: They are used among others in aeronautics and in the automotive industries as well as in the packing, construction and leisure industries. This special issue will be focused on studying the fiber raw materials and their products, the characteristics of products and development applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **fiber materials**. Potential topics include, but are not limited to:

- Nanofibers
- Nonwoven
- Optical fiber
- Composite fiber materials
- Fiber reinforcement and modification
- Smart textile materials
- Fiber and Textile technology
- Environmental issues

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Fiber Materials**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 16th, 2014
Publication Date	December 2014
