

Special Issue on Additive Manufacturing Materials

Call for Papers

Additive manufacturing (AM), also known as 3D printing, is a process of creating a three-dimensional object from a digital file. It offers many advantages in the production of parts, presenting unrivalled design freedom with the ability to manufacture single or multiple components from a wide range of materials. It is foreseeable that additive manufacturing will be integrated across all manufacturing industries.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **additive manufacturing materials**. Potential topics include, but are not limited to:

- Materials of additive manufacturing
- Materials powder production and processes
- Material properties and tests
- Additive manufacturing technology
- 3D printing
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Additive Manufacturing Materials**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 18th, 2017
Publication Date	March 2017
