

Special Issue on Batteries and Materials

Call for Papers

The demand for lithium-ion batteries is growing steadily, and new applications such as electric cars and plug-in hybrid cars will spur demand even further in the coming years. Indeed, cathode active materials are central to the performance, affordability, safety and sustainability of advanced electrified vehicles' batteries. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Batteries and Materials**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Batteries and Materials**. In this special issue, potential topics include, but are not limited to:

- Lithium ion batteries
- Solar cell
- Fuel cell technology
- Battery design and modification
- Battery electrode materials
- Battery materials

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Batteries and Materials**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 16th, 2020
Publication Date	June 2020
