

Special Issue on Biological Resources and Conservations

Call for Papers

Biological resources means plants, animals and micro-organisms or parts thereof, their genetic material and by-products (excluding value added products) with actual or potential use or value, but does not include human genetic material. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Biological Resources and Conservations**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Biological Resources and Conservations**. In this special issue, potential topics include, but are not limited to:

- Regeneration of biological resources
- Diversity of uses of biological resources
- Regional distribution of biological resources
- Stability and variability of biological resources
- Utilization value of biological resources
- Existential threats to biological resources
- Measures to protect biological resources

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Biological Resources and Conservations**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 22nd, 2026
Publication Date	October 2026
