

## Special Issue on Renewable Resources

### Call for Papers

Renewable resources include solar energy, wind, falling water, the heat of the earth (geothermal), plant materials (biomass), waves, ocean currents, temperature differences in the oceans and the energy of the tides. Renewable energy technologies produce power, heat or mechanical energy by converting those resources either to electricity or to motive power. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **renewable resources**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **renewable resources**. In this special issue, potential topics include, but are not limited to:

- Air, food and water
- Renewable organic products
- Renewable energy
- Threats to renewable resources
- Development and utilization of renewable resources
- Social, Economic, and Environmental Impacts of Renewable Energy Resources
- Global impact of renewable resources
- Renewable resources management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Renewable Resources**” should be selected during your submission.

Special Issue timetable:

|                     |                     |
|---------------------|---------------------|
| Submission Deadline | September 5th, 2026 |
| Publication Date    | November 2026       |
