

Special Issue on Earth and Space Science: Deep Space

Exploration and Earth System Evolution

Call for Papers

Earth and Space Science (ESS) is a broad, interdisciplinary field that investigates the physical, chemical, and biological processes governing the Earth and its surrounding space environment. It integrates knowledge from geology, oceanography, atmospheric science, planetary science, astrophysics, and heliophysics to understand the origin, evolution, and current state of our planet and the solar system. ESS also addresses pressing societal challenges such as climate change, natural hazards, resource sustainability, and space weather. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Earth and Space Science: Deep Space Exploration and Earth System Evolution**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Earth and Space Science: Deep Space Exploration and Earth System Evolution**. In this special issue, potential topics include, but are not limited to:

- Deep Space Exploration Technology and Planetary Science
- Earth System Co-evolution Mechanism
- Interdisciplinary Space Environment and Earth Effect
- Astronomy and Astrobiology Frontier
- Digital Earth and Cross-scale Simulation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Earth and Space Science: Deep Space Exploration and Earth System Evolution**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 18th, 2026
Publication Date	November 2026
