Special Issue on

The Application of Artificial Intelligence in the Economy

Call for Papers

The integration of Artificial Intelligence (AI) into economic systems represents a transformative shift in how production, consumption, and resource allocation are organized. AI technologies—including machine learning (ML), natural language processing (NLP), robotics, and generative AI—are reshaping industries, labor markets, and macroeconomic policies. This study examines the multifaceted applications of AI in the economy, emphasizing its theoretical foundations, empirical impacts, and emerging research frontiers. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **The Application of Artificial Intelligence in the Economy**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **The Application of Artificial Intelligence in the Economy**. In this special issue, potential topics include, but are not limited to:

- AI and Labor Markets
- AI and Productivity Growth
- AI and Macroeconomic Dynamics
- AI and Market Structure
- AI and Development Economics
- AI and Ethical/Regulatory Challenges

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *The Application of Artificial Intelligence in the Economy***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 16th 2026
Publication Date	July 2026
