

## Special Issue on Robotics and Automation

### Call for Papers

Robotics and Automation represent interdisciplinary fields that integrate principles from mechanical engineering, electrical engineering, computer science, and artificial intelligence (AI) to design, develop, and deploy intelligent systems capable of performing tasks autonomously or semi-autonomously. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Robotics and Automation**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Robotics and Automation**. In this special issue, potential topics include, but are not limited to:

- Robot Design and Kinematics
- Control Systems
- Perception and Sensing
- Artificial Intelligence in Robotics
- Industrial Automation
- Medical Robotics
- Autonomous Vehicles
- Agricultural Robotics
- Explainable AI for Robotics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Robotics and Automation**” should be selected during your submission.

Special Issue timetable:

|                     |                |
|---------------------|----------------|
| Submission Deadline | July 19th 2026 |
| Publication Date    | September 2026 |
