

Special Issue on Applications of Industrial Technology

Call for Papers

Application of Industrial Technology is an applied, interdisciplinary field concerned with the practical deployment of engineering principles, technological systems, and management methodologies to optimize industrial operations, manufacturing processes, and service delivery. It bridges engineering science and industrial practice, focusing on the design, implementation, evaluation, and continuous improvement of technological solutions that enhance productivity, quality, safety, and sustainability across industrial sectors. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Applications of Industrial Technology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Applications of Industrial Technology**. In this special issue, potential topics include, but are not limited to:

- Manufacturing Technology and Processes
- Automation, Control, and Robotics
- Industrial Informatics and Smart Manufacturing
- Industrial Engineering and Operations Management
- Quality, Reliability, and Maintenance Engineering
- Sustainable and Green Industrial Technology
- Energy and Power Systems in Industry
- Industrial Design and Human Factors
- Logistics, Supply Chain, and Material Handling
- Industrial Safety and Risk Management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Applications of Industrial Technology**” should be selected during your submission.
