

Special Issue on Marine Engineering

Call for Papers

Marine Engineering is a comprehensive, application-oriented engineering discipline that integrates fundamental theories of mechanics, thermodynamics, electrical engineering, materials science, and automation to address the unique technical challenges posed by the harsh marine environment. It focuses on the design, construction, installation, operation, maintenance, and intelligent optimization of marine vessels, offshore structures, ocean energy systems, and marine resource exploitation facilities, serving as the core technical foundation for human exploration, utilization, and sustainable protection of the ocean. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Marine Engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Marine Engineering**. In this special issue, potential topics include, but are not limited to:

- Ship Power and Propulsion System Engineering
- Offshore and Deep-Sea Structural Engineering
- Marine Materials and Corrosion Protection Engineering
- Intelligent and Autonomous Marine Systems
- Marine Renewable Energy and Resource Utilization Engineering
- Marine Hydrodynamics and Vessel Performance Engineering
- Marine Environmental Protection and Safety Engineering

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Marine Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 18th 2026
Publication Date	January 2027

Guest Editor:

Scientific Research
Open Access

**Open Journal of Applied
Sciences**

ISSN Online:2165-3925
