

Special Issue on
Animal Science and Livestock Production
Call for Papers

Animal Science and Livestock Production studies the biology, management, nutrition, breeding and health of domesticated animals used for food, fiber, labor and other agricultural purposes. The field focuses on improving animal productivity, welfare, reproduction and sustainability in livestock systems. It integrates genetics, veterinary science, nutrition and environmental management to support efficient and ethical animal production for global food security and agricultural development.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Animal Science and Livestock Production**. Potential topics include, but are not limited to:

- Animal nutrition and feed science
- Animal genetics and breeding
- Livestock reproduction and physiology
- Animal health and disease management
- Animal biotechnology
- Animal behavior and welfare
- Poultry science
- Dairy science
- Aquaculture and fisheries
- Swine production systems
- Meat science and livestock products
- Animal by-products
- Sustainable livestock and environmental impact
- Precision livestock farming
- Industrial or medical applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Animal Science and Livestock Production**” should be chosen during your submission.

According to the following timetable:

Scientific Research
Open Access

Open Journal of Animal Sciences

ISSN Online: 2161-7627

Submission Deadline	September 10th, 2026
Publication Date	November 2026
