

Special Issue on
Sustainable Construction and Project Management
Call for Papers

Sustainable Construction and Project Management addresses the integration of environmental responsibility, economic efficiency, and social sustainability into the planning, design, execution, and management of construction projects. This field includes green building practices, sustainable construction materials, energy-efficient design, lifecycle assessment, construction waste management, carbon emission reduction, resource optimization, and sustainable infrastructure development. Research in this area aims to improve project performance, reduce environmental impacts, enhance resource efficiency, and promote resilient and cost-effective built environments through innovative construction methods, digital technologies, and effective project management strategies. It also addresses challenges related to green building certification, climate adaptation, circular economy principles, construction safety, stakeholder collaboration, and the long-term sustainability of buildings and infrastructure.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Sustainable Construction and Project Management**. Potential topics include, but are not limited to:

- Sustainable construction practices
- Green building design
- Sustainable construction materials
- Construction project management
- Energy-efficient building technologies
- Lifecycle assessment of buildings
- Construction waste management
- Carbon emission reduction in construction
- Sustainable infrastructure development
- Resource efficiency and optimization
- Circular economy in construction
- Digital technologies in construction
- Climate-resilient construction
- Construction safety and risk management
- Green building certification and standards
- Sustainable urban development

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sustainable Construction and Project Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 10th, 2027
Publication Date	May 2027
