

Special Issue on Human Ecology

Call for Papers

Human Ecology is an interdisciplinary study of the relationship between humans and their natural, social, and environments by using the basic principle of ecology. It focuses on study the population dynamics, food and energy supplies, the interaction of humans and environment, as well as the ecological environment problems produced by economic activities. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **human ecology**.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **human ecology**. Potential topics include, but are not limited to:

- Population distribution, explosion, and aging
- Human health and environment
- Human ecological system theory
- Ecological crisis
- Sustainable development and human ecology
- Human ecological construction

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue –Human Ecology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	July 31st, 2014
Publication Date	September 2014
