

Special Issue on Wetlands Ecology and Management

Call for Papers

A wetland is a distinct ecosystem in which water covers the soil, or is present either at or near the surface of the soil all year or for varying periods of time during the year, including during the growing season. The water in wetlands is either freshwater, brackish or saltwater. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Wetlands Ecology and Management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Wetlands Ecology and Management**. Potential topics include, but are not limited to:

- Estuaries
- Floodplains
- Hydric soil
- Hydrophytes
- Mangrove
- Marshes
- Peatlands
- River basin
- Springs, seeps and fens
- Swamps
- Water chemistry
- Water storage
- Wetlands biology
- Amazon River Basin
- West Siberian Plain
- Coastal/tidal wetlands
- Inland/non-tidal wetlands

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Wetlands Ecology and Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 10th, 2022
Publication Date	April 2022
