

Special Issue on Species Diversity and Habitat Conservation

Call for Papers

Species Diversity and Habitat Conservation focuses on the study and protection of biological diversity across ecosystems, emphasizing the preservation of species richness, genetic variation, and ecosystem integrity. The field examines the ecological processes that sustain biodiversity, the impacts of human activities such as land-use change, climate change, pollution, and overexploitation, and the strategies used to mitigate biodiversity loss. It integrates ecological science, conservation biology, environmental management, and policy to develop effective conservation planning, habitat restoration, and species management approaches. By safeguarding habitats and maintaining species diversity, this field supports ecosystem resilience, sustainable development, and the long-term health of the natural environment.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Species Diversity and Habitat Conservation**. Potential topics include, but are not limited to:

- Biodiversity assessment and monitoring
- Climate change impacts on biodiversity
- Community-based conservation
- Conservation biology
- Conservation genetics
- Ecosystem management
- Endangered species conservation
- Environmental policy and conservation planning
- Habitat restoration ecology
- Invasive species management
- Landscape ecology
- Marine and freshwater conservation
- Protected area management
- Species population dynamics
- Terrestrial ecosystem conservation
- Wildlife ecology and management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Species Diversity and Habitat Conservation**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 22nd, 2026
Publication Date	June 2026

Guest Editor:

Dr. Moses Fayiah

School of Natural Resources Management, Njala University, West Africa
