

Special Issue on Biodiversity and Habitat Protection

Call for Papers

Biodiversity and Habitat Protection focuses on the conservation, restoration, and sustainable management of biological diversity and natural habitats to maintain healthy ecosystems and ecological balance. It covers research on species diversity, ecosystem conservation, habitat restoration, protected areas, wildlife management, invasive species control, ecological monitoring, climate change impacts, landscape ecology, and biodiversity conservation strategies. The field promotes interdisciplinary approaches that integrate ecological science, environmental management, policy development, and community participation to safeguard biodiversity, enhance ecosystem resilience, and support sustainable development for present and future generations.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Biodiversity and Habitat Protection**. Potential topics include, but are not limited to:

- Species conservation
- Habitat restoration
- Ecosystem management
- Wildlife conservation
- Protected areas
- Landscape ecology
- Conservation biology
- Biodiversity assessment
- Ecological restoration
- Invasive species management
- Forest conservation
- Marine biodiversity
- Freshwater ecosystems
- Climate change adaptation
- Ecological monitoring
- Sustainable resource management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Biodiversity and Habitat Protection**” should be selected during your submission.
