

Research on Endocrinology Collection

(Scientific Papers 2016)

-From Ipemed Medical School, Brazil

Endocrinology is the study of biology and medicine that relates to the endocrine system. Endocrine system is the system that controls hormones, which consists of several glands that secrete hormones directly into the blood rather than into a duct system.

Ipemed Medical School contributes a number of valuable papers for this Endocrinology Collection.

Its topics include, but are not limited to the followings:

- Diabetes types 1 and 2 and their current clinical approaches
- Dyslipidemia: treatment and perspective
- Obesity, insulin resistance and related disorders
- Polycystic ovarian syndrome
- Hormone homeostasis and hormone replacement therapies
- Molecular pathways and common thyroid diseases
- Unfrequent metabolic diseases

If you have relevant papers to be published, welcome to submit them to this collection through [Paper Submission System](#). Authors should read over the journal's [For Authors](#) carefully before submission.

“Research on Endocrinology Collection (Scientific Papers 2016)” should be selected during your submission if you would like to add your research work into this collection.

According to the following timetable:

Submission Deadline	November 30th, 2015
Publication Date	January 2016
