Open Journal of Epidemiology (OJEpi) is an international journal dedicated to the latest advancement of Epidemiology. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of Epidemiology. All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy.

- Cancer Epidemiology
- Cardiovascular Disease Epidemiology
- Epidemiology of Aging
- Epidemiology of Zoonosis
- Infectious Disease Epidemiology
- Intestinal Epidemiology
- Neuroepidemiology
- Obesity/Diabetes Epidemiology
- Occupational Injury & Illness Epidemiology
- Oral/Dental Epidemiology
- Pediatric Epidemiology
- Psychiatric Epidemiology
- Quantitative Parasitology
- Renal Epidemiology
- Reproductive Epidemiology
- Respiratory Epidemiology
- Veterinary Epidemiology

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the OJEpi.

What is SCIRP?

Scientific Research Publishing (SCIRP) is an open access academic publisher. It currently publishes more than 200 peer-reviewed open access journals covering a broad spectrum of academic disciplines. Through its open access publishing model, SCIRP is committed to supporting the global research community and promoting the dissemination, exchange, and application of scholarly knowledge.

What is Open Access?

SCIRP ensures that all original research papers it publishes are offered free and continuing online accessibility as soon as they are published. In order to deliver open access journals, SCIRP charges authors to cover operational expenses and subscription fees only for the printed version. Open access publishing allows for unrestricted and worldwide access to the complete text of research papers, and is thus most advantageous to the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
