

## Special Issue on Forest Biodiversity

### Call for Paper

Forest biological diversity is broad term referring to all the life forms found within forested areas and the ecological roles they perform. As such, forest biological diversity encompasses not just trees but the multitude of plants, animals and micro-organisms that inhabit forest areas and their associated genetic diversity. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Forest Biodiversity**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Forest Biodiversity**. In this special issue, potential topics include, but are not limited to:

- Species conservation and nature reserves
- Diversity of vegetation types
- The value of biodiversity
- Analysis of community species diversity
- Comparison of biodiversity significance and intactness
- Forest biodiversity evaluation system
- Measuring forest biodiversity status and changes globally

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Forest Biodiversity**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 25th, 2026
Publication Date	June 2026
