

Special Issue on Rare Earth and Actinide Research

Call for Papers

As the fields of organometallic and coordination chemistry of the transition metals has grown more mature, the under-explored chemistry of the rare earths and actinides has drawn the attention of research groups from across the globe looking for new fundamental discoveries and access to compounds with unique properties.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **rare earth and actinide research**. Potential topics include, but are not limited to:

- Rare earth and actinide complexes
- Luminescent materials
- Rare earth and actinide alloys
- Separation and extraction of rare earth and actinide
- Analysis of rare earths and actinides
- Properties of rare earths and actinides
- Rare earth industry and environmental protection
- Applications of rare earth and actinide

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Rare Earth and Actinide Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 22th, 2017
Publication Date	April 2017
