

## Special Issue on Fertility and Sterility Research

### Call for Papers

**Fertility** is the natural ability of an individual or couple to produce offspring. Human fertility requires the production of enough healthy sperm by the male and viable eggs by the female, it depends on factors of nutrition, sexual behavior, culture, endocrinology and some else. On the contrary, sterility is considered as the state of being unable to produce offspring, in a woman it is an inability to conceive. There are many biological causes of sterility, including some can be treated by medical intervention. This special issue will be focused on studying different kinds of **fertility and sterility research** and their applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **fertility and sterility research**. Potential topics include, but are not limited to:

- Preservation of fertility
- Determinants of fertility
- Symptom and evaluation of sterility
- Sterility therapy and surgery
- Embryo transfer
- Behavioral and psychosocial research
- Clinical trials for sterility

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Fertility and Sterility Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 16th, 2014
Publication Date	November 2014
