

Special Issue on Endometriosis

Call for Papers

Endometriosis is disease that occurs when the tissue that lines the uterus grows outside the uterus. This disease is especially common among women in their 30s and 40s. Symptoms may include abdominal pain, heavy periods, and infertility. Treatment consists of pain relievers, hormones, surgery and other medications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Endometriosis**. Potential topics include, but are not limited to:

- Endometriosis and infertility
- Aromatase inhibitors
- Endometriotic cysts
- Cutaneous endometriosis
- Diaphragmatic endometriosis
- Hormone contraception therapy
- Endometrial lesions
- Manual physical therapy
- Ovarian endometriosis
- Complications of endometriosis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Endometriosis**” should be selected during your submission.

Special Issue Timetable:

| | |
|---------------------|---------------------|
| Submission Deadline | December 15th, 2015 |
| Publication Date | February 2016 |
