

Special Issue on High Risk Pregnancy

Call for Papers

A high risk pregnancy is one in which some condition puts the mother, the developing fetus, or both at higher-than-normal risk. For a high risk pregnancy, a special monitoring or care will be needed throughout the whole process (before, during or after delivery) to ensure the best possible outcome.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **High Risk Pregnancy**. Potential topics include, but are not limited to:

- Abruptio placentae
- Advanced maternal age
- Exposure to teratogens
- Eclampsia
- Gestational diabetes
- Multiple gestation
- Placenta previa
- Preeclampsia
- Pregnancy complications
- Premature labor

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - High Risk Pregnancy**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 28th, 2016
Publication Date	February 2017
