

Special Issue on Fetal Health and Development

Call for Papers

A fetus grows and develops inside the mother's womb that normally lasts nine months, which consists of three trimesters, each has three-month period of pregnancy. During each trimester, specific prenatal tests are needed to monitor the maternal and fetal health, so as to detect birth defects, identify problems that may affect childbirth and address fetal problems before the baby is born, etc..

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Fetal Health and Development**. Potential topics include, but are not limited to:

- Fetal anomalies
- Fetal birth defects
- Fetal circulation
- Fetal development
- Fetal echocardiography
- Fetal shunt surgery
- Hydrops fetalis
- Maternal-fetal medicine

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Fetal Health and Development**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 30th, 2017
Publication Date	August 2017
