

## Special Issue on Infertility and Management

### Call for Papers

Infertility is “a disease of the reproductive system defined by the failure to achieve a clinical pregnancy after 12 months or more of regular unprotected sexual intercourse (and there is no other reason, such as breastfeeding or postpartum amenorrhea). Primary infertility is infertility in a couple who have never had a child. Secondary infertility is failure to conceive following a previous pregnancy. Infertility may be caused by infection in the man or woman, but often there is no obvious underlying cause.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **infertility and management**. Potential topics include, but are not limited to:

- Causes of subfertility
- Sperm dysfunction
- Ovulation disorder
- Fallopian tube damage
- Age on fertility
- Medical treatments
- Hormonal therapy
- Lifestyle
- Vitro fertilization

Authors should read over the journal’s [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Infertility and Management**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 20th, 2018
Publication Date	August 2018
