

Special Issue on Female Pelvic Medicine

Call for Papers

Female Pelvic Medicine is a medical specialty focused on diagnosing and treating disorders of the female pelvic floor and urinary tract. It addresses conditions such as urinary incontinence, pelvic organ prolapse and pelvic pain. The field integrates urology, gynecology and reconstructive surgery to improve bladder, bowel and sexual function, aiming to enhance quality of life through both surgical and non-surgical treatments.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Female Pelvic Medicine**. Potential topics include, but are not limited to:

- Urogynecology
- Pelvic organ prolapse
- Female urinary incontinence
- Fistula repair
- Pelvic floor disorders and dysfunction
- Pelvic floor physical therapy
- Neurogenic bladder conditions
- Urodynamics and advanced diagnostic testing
- Urogynecological imaging and diagnostics
- Sexual health and dysfunction
- Female pelvic pain syndromes
- Pelvic inflammatory disease
- Reconstructive pelvic surgery
- Minimally invasive gynecologic surgery
- Postpartum pelvic health
- Obstetrical injury and prevention
- Congenital anomalies

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Female Pelvic Medicine**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 19th, 2026
Publication Date	October 2026
