**Special Issue on**  
**Maternal-Fetal Medicine and Obstetric Research**  
**Call for Papers**

Maternal-Fetal Medicine and Obstetric Research is a medical field focused on the health of pregnant individuals and their unborn babies. It studies high-risk pregnancies, fetal development, prenatal diagnosis and complications during pregnancy and childbirth. The field integrates clinical obstetrics, genetics, and perinatal medicine to improve maternal and fetal outcomes through advanced monitoring, medical interventions and evidence-based care strategies.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Maternal-Fetal Medicine and Obstetric Research**. Potential topics include, but are not limited to:

- High-risk pregnancy management
- Fetal medicine and prenatal diagnosis
- Obstetric ultrasound and imaging
- Minimally invasive fetal interventions
- Maternal health and pregnancy complications
- Perinatal epidemiology
- Infection and immunology in pregnancy
- Preterm birth prevention, prediction and mechanisms
- Placental biology and function
- Fetal growth restriction and developmental disorders
- Preeclampsia and hypertensive disorders
- Gestational diabetes
- Labor, delivery and obstetric interventions
- Reproductive genetics and maternal-fetal genomics
- Multiple gestation management
- Maternal mortality and morbidity
- Obstetric emergencies and critical care
- Postpartum health and recovery
- Global maternal-fetal health and policy

**Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).**
