

Special Issue on
Gynecologic Oncology & Women's Health
Call for Papers

Gynecologic Oncology & Women's Health is an interdisciplinary field focusing on the prevention, diagnosis, treatment and management of gynecologic cancers and women's health conditions across the lifespan. It encompasses ovarian, cervical, endometrial, vulvar and vaginal cancers, as well as screening, reproductive health, hormonal health, survivorship and supportive care. Research explores advances in early detection, precision medicine, minimally invasive surgery, targeted therapies, prevention and strategies to improve women's health and quality of life.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Gynecologic Oncology & Women's Health**. Potential topics include, but are not limited to:
