

Special Issue on Neonatal Medicine

Call for Papers

Neonatal Medicine focuses on the medical care and development of newborn infants, particularly premature, low-birth-weight or critically ill neonates. The field addresses neonatal physiology, intensive care, congenital disorders, respiratory and neurological conditions, nutrition, infection prevention and long-term developmental outcomes. It aims to improve neonatal survival, health and quality of life through advanced clinical care, research and evidence-based interventions.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Neonatal Medicine**. Potential topics include, but are not limited to:

- Neonatal intensive care
- Preterm births and associated complications
- Newborn screening
- Neonatal cardiology
- Neonatal neurology
- Neonatal hematology
- Neonatal gastroenterology
- Neonatal nephrology
- Neonatal respiratory medicine
- Neonatal infectious disease and immunology
- Neonatal endocrinology and metabolism
- Congenital and genetic disorders
- Neonatal nutrition, growth and development
- Neonatal surgery
- Neonatal imaging
- Neonatal nursing and developmental care
- Developmental follow-up and outcomes research

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Neonatal Medicine**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 3rd, 2026
Publication Date	November 2026
