

Special Issue on
Pediatric Infectious Diseases and Child Health
Call for Papers

Pediatric Infectious Diseases and Child Health is an interdisciplinary field focused on the prevention, diagnosis, treatment and management of infectious diseases affecting infants, children and adolescents. It encompasses emerging infections, vaccine-preventable diseases, antimicrobial resistance, pediatric immunology, infection control and global child health. The field integrates clinical, epidemiological and translational research to improve disease prevention, therapeutic strategies, health outcomes and the overall well-being of children.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Pediatric Infectious Diseases and Child Health**. Potential topics include, but are not limited to:

- Pediatric Bacterial and Viral Infections
- Emerging and Re-emerging Pediatric Infectious Diseases
- Vector-Borne and Tropical Childhood Infections
- Hospital-Acquired and Nosocomial Infections
- Chronic and Recurrent Pediatric Infections
- Diagnostic methods and laboratory research
- Transmission Dynamics of Pediatric Infections
- Pediatric Vaccinology and Immunization
