## Special Issue on Health Education and Promotion

### Call for Papers

Health promotion is a behavioral social science that draws from the biological, environmental, psychological, physical and medical sciences to promote health and prevent disease, disability and premature death through education. Health promotion is the development of individual, group, institutional, community and systemic strategies to improve health knowledge, attitudes, skills and behavior. Health education aims to improve healthy behaviors.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Health Education and Promotion**. Potential topics include, but are not limited to:

- Public health education
- Community Health, education and promotion
- Health knowledge education
- Mental health and education
- Education and disease prevention
- Educational interventions
- Influences of health behaviors
- Education and Quality of Life
- Education for healthcare and nursing
- Medical education in primary care
- Obesity and physical education
- Eating behaviors
- Sexual and sex education
- Healthy lifestyles
- Nutrition education
- Smoking, alcohol, health and education
- Global health education
- Health and social care

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Health Education and Promotion**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 19th, 2021
Publication Date	May 2021
