

Special Issue on Philosophy of Science

Call for Papers

Philosophy of Science is the branch of philosophy that examines the foundations, methods, assumptions, and implications of scientific inquiry. It explores how scientific knowledge is generated, tested, justified, and applied, addressing topics such as scientific reasoning, theory formation, explanation, causation, objectivity, and the nature of evidence. The field also investigates the relationship between science and society, ethical issues in research, and the evolution of scientific paradigms. By critically analyzing the principles and practices of science, philosophy of science contributes to a deeper understanding of the reliability, limitations, and broader significance of scientific knowledge across disciplines.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Philosophy of Science**. Potential topics include, but are not limited to:

- Scientific epistemology
- Scientific methodology
- Philosophy of physics
- Philosophy of biology
- Philosophy of chemistry
- Philosophy of mathematics
- Philosophy of medicine
- Philosophy of psychology
- Philosophy of social science
- Philosophy of technology
- Logic of science
- Scientific realism
- Philosophy of experimentation
- Ethics of science
- History of science
- Science and society

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Philosophy of Science**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 25th, 2026
Publication Date	January 2027
