

Special Issue on Philosophy & Technology

Call for Papers

Philosophy & Technology examines the conceptual, ethical, and social implications of technological development and its influence on human life. It considers questions surrounding artificial intelligence, digitalization, automation, emerging technologies, technological power, human agency, privacy, responsibility, and the changing relationship between people and technological systems. The topic also encourages critical examination of how technological innovation shapes knowledge, values, social structures, and decision-making, while considering principles for developing and applying technology in ways that support human dignity, autonomy, fairness, and societal well-being.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Philosophy & Technology**. Potential topics include, but are not limited to:

- Philosophy of technology
- Ethics of technology
- Philosophy of artificial intelligence
- Technology and human values
- Technology and society
- Technological determinism
- Human-technology relations
- Digital ethics
- Algorithmic ethics
- Technology and autonomy
- Technology and freedom
- Privacy and surveillance
- Philosophy of information
- Ethics of innovation
- Responsible technology
- Technology and social justice

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Philosophy & Technology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 28th, 2026
Publication Date	February 2027
