

Special Issue on Schizophrenia

Call for Papers

Schizophrenia is a chronic mental disorder that affects how a person thinks, feels, and behaves. It is a complex condition that impacts a person's perception of reality, often leading to difficulties in distinguishing what is real from what is not. The exact cause of schizophrenia is still unknown, but it is believed to involve a combination of genetic, environmental, and neurochemical factors.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Schizophrenia**. Potential topics include, but are not limited to:

- Mental disorder
- Chronic condition
- Hallucinations
- Delusions
- Disorganized thinking
- Positive symptoms
- Negative symptoms
- Cognitive symptoms
- Genetic factors
- Environmental factors
- Neurochemical factors
- Late adolescence/early adulthood onset
- Medication
- Psychosocial interventions
- Antipsychotic medications
- Cognitive behavioral therapy
- Family therapy
- Quality of life

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Schizophrenia**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 15th, 2024
Publication Date	November 2024

Guest Editor:

Dr. Jasneth Mullings
Lecturer/Dean/Epidemiologist
Health Research Resource Unit
The University of the West Indies, India
