

Special Issue on Psychiatry and Mental Health

Call for Papers

Psychiatry and Mental Health is a multidisciplinary field concerned with the understanding, diagnosis, treatment, and prevention of mental, emotional, and behavioral disorders across the lifespan. It integrates clinical practice, neuroscience, psychology, and social sciences to address the complex interactions between biological, psychological, and social factors that influence mental well-being. The field encompasses a wide range of conditions, including mood disorders, anxiety disorders, psychotic disorders, and substance use disorders, and emphasizes evidence-based interventions such as psychotherapy, pharmacological treatment, and community-based care. By promoting mental health awareness, early intervention, and holistic treatment approaches, this field aims to improve individual functioning, quality of life, and overall public health.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Psychiatry and Mental Health**. Potential topics include, but are not limited to:

- Addiction psychiatry
- Behavioral and cognitive sciences
