

Special Issue on Soil Fertility

Call for Papers

Soil Fertility refers to the ability of soil to provide all essential plant nutrients in available forms and in a suitable balance whereas soil productivity is the resultant of several factors such as soil fertility, good soil management practices availability of water supply and suitable climate.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **soil fertility**. Potential topics include, but are not limited to:

- Texture and structure
- Trace element and minerals
- Soil pH and soil moisture
- Soil microorganisms
- Soil organic matter and topsoil
- Soil contamination
- Soil erosion, depletion and conservation
- Soil and agriculture cropping

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Soil Fertility**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 29th, 2016
Publication Date	November 2016
