

Special Issue on Dentistry and Oral Health

Call for Papers

Dentistry and Oral Health studies the prevention, diagnosis and treatment of diseases affecting the teeth, gums and oral cavity. It integrates clinical practice, biomedical science and public health to address conditions such as dental caries, periodontal disease and oral infections. The field also emphasizes oral hygiene, preventive care and patient education, aiming to improve overall health, function and quality of life through effective dental care and oral health promotion.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Dentistry and Oral Health**. Potential topics include, but are not limited to:

- Endodontics
- Periodontics
- Restorative dentistry
- Orthodontics and dentofacial orthopedics
- Prosthodontics
- Oral and maxillofacial surgery
- Dental implants
- Oral pathology
- Digital dentistry
- Oral microbiology and immunology
- Oral pathology and oral medicine
- Oral oncology
- Pediatric dentistry
- Geriatric dentistry
- Dental public health and epidemiology
- Dental materials
- Preventive care and oral hygiene

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Dentistry and Oral Health**” should be chosen during your submission.

According to the following timetable:
