

Special Issue on Trauma and Emergency Surgery

Call for Papers

In physical medicine, trauma is a body wound or shock caused by physical harm from an external source, such as violence or accident. Emergency surgery deals with the medical emergency which needs immediate surgical intervention. This issue aims to discover new methods of treating physical trauma and emergency patients through laboratory, outcomes and clinical research programs.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Trauma and Emergency Surgery**. Potential topics include, but are not limited to:

- Thermal burn
- Chemical burn
- Blunt trauma
- Abdominal trauma
- Gallbladder removal
- Appendix removal
- Cardiac tamponade
- Urinary retention
- Acute subdural hematoma
- Ruptured aortic aneurysm
- Internal bleeding

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Trauma and Emergency Surgery**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 31st, 2018
Publication Date	April 2018

Guest Editor:

Scientific Research
Open Access

Surgical Science

ISSN Online: 2157-9415
