

Special Issue on Spine Surgery

Call for Papers

Spine surgery is a specialized field of medicine that focuses on the surgical treatment of disorders affecting the spine, spinal cord and surrounding structures. It encompasses procedures for degenerative spinal diseases, spinal deformities, trauma, tumors, infections and congenital conditions. The field integrates advanced surgical techniques, minimally invasive procedures, robotics, navigation technologies and postoperative rehabilitation to improve patient outcomes, restore function, relieve pain and enhance quality of life.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **spine surgery**. Potential topics include, but are not limited to:

- Minimally invasive spine surgery
- Degenerative spine disorders
- Spinal deformity surgery
- Spinal trauma and fracture management
- Spinal oncology
- Cervical and lumbar spine surgery
- Pediatric spine surgery
- Navigation, robotics and image-guided spine surgery
- Intraoperative neurophysiological monitoring and neuromapping
- Spinal fusion, biomaterials, and implant technology
- Artificial intelligence, predictive modeling and enhanced recovery
- Postoperative rehabilitation and clinical outcomes

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Spine Surgery**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 4th, 2026
Publication Date	January 2027

Scientific Research
Open Access

Surgical Science
ISSN Online: 2157-9415
