

Special Issue on Financial Economics

Call for Papers

Financial Economics studies how individuals, firms and markets allocate financial resources under conditions of uncertainty and risk. It examines asset pricing, investment decisions, capital markets and financial behavior using economic theory and quantitative methods. The field explores how financial systems influence economic activity, resource allocation and market efficiency, with applications in banking, corporate finance, investment management and public policy.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Financial Economics**. Potential topics include, but are not limited to:

- Financial modeling
- Behavioral economics and finance
- Financial econometrics and empirical methods
- Corporate finance
- Public finance and fiscal policy
- Macroeconomics and finance
- Financial markets and institutions
- Investment analysis and portfolio management
- International financial economics
- Financial decision making
- Market microstructure and liquidity
- Banking and monetary economics
- Asset pricing theory
- Option pricing theory
- Derivatives pricing and risk management
- Fixed income and credit risk
- Financial regulation
- Fintech & financial innovation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Financial Economics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 29th, 2026
Publication Date	October 2026
