

Special Issue on Civil Engineering and Urban Systems

Call for Papers

Civil Engineering and Urban Systems is an interdisciplinary, application-driven research domain that integrates the core principles of traditional civil engineering with systematic urban science, focusing on the full lifecycle planning, design, construction, operation, maintenance and adaptive governance of interconnected urban built environments and their supporting infrastructure networks. Rooted in addressing the multi-dimensional pressures of rapid global urbanization, climate change, population growth and aging infrastructure, this field transcends isolated single-structure engineering research to treat cities as coupled, dynamic socio-technical-ecological systems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Civil Engineering and Urban Systems**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Civil Engineering and Urban Systems**. In this special issue, potential topics include, but are not limited to:

- Urban Infrastructure System Planning & Smart Governance
- Sustainable Urban Built Environment Design
- Urban Resilience & Multi-hazard Disaster Mitigation
- Urban Water & Environmental Systems Engineering
- Urban Geotechnical & Underground Space Development
- Urban Transportation & Mobility Systems
- Urban Socio-Technical System Assessment & Policy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Civil Engineering and Urban Systems**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 10th 2026
Publication Date	January 2027

Guest Editor:

Scientific Research
Open Access

**World Journal of
Engineering and Technology**
ISSN Online:2331-4249
