

Special Issue on Epilepsy

Call for Papers

Epilepsy is a brain disorder characterized by a tendency for recurrent seizures. The seizures involve abnormal electrical activity in the brain that causes an involuntary change in body movement or function, sensation, awareness, or behavior. Epilepsy has many possible causes, including serious brain trauma, stroke, tumors and problems in the brain as a result of a previous infection. In many cases, the cause is unknown.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Epilepsy**. Potential topics include, but are not limited to:

- Epilepsy symptoms
- Types of epilepsy
- Epilepsy treatment
- Seizures in children
- Epilepsy in animals
- Absence seizures
- Seizure medications
- Epilepsy surgery
- Status epilepticus
- Psychological interventions
- Sudden unexpected death in epilepsy
- Prevention of epilepsy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Epilepsy**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 31st, 2016
Publication Date	May 2016
