

Special Issue on Multiple Sclerosis

Call for Papers

Multiple sclerosis (MS) is a nervous system disease in which the insulating covers of nerve cells in the brain and spinal cord are damaged. The disease can cause the nerves themselves to deteriorate or become permanently damaged. People with MS may experience fatigue, vision problems, pain in parts of the body, slurred speech, numbness or even paralysis, vision loss, and diminished brain function, etc..

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Multiple Sclerosis**. Potential topics include, but are not limited to:

- Acute attacks
- Disease-modifying treatments
- Associated symptoms
- Alternative treatments
- Medical discovery
- Historical cases
- Risk factors
- Complications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Multiple Sclerosis**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 15th, 2016
Publication Date	August 2016
