

## Special Issue on Neurodegeneration

### Call for Papers

**Neurodegeneration** is the umbrella term for the progressive loss of structure or function of neurons, including death of neurons. Many neurodegenerative diseases including amyotrophic lateral sclerosis, Parkinson's, Alzheimer's, and Huntington's occur as a result of neurodegenerative processes.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **neurodegeneration**. Potential topics include, but are not limited to:

- Genetics
- Protein misfolding
- Protein degradation pathways
- Membrane damage
- Mitochondrial dysfunction
- Axonal transport
- Programmed cell death
- Specific disorders
- Aging and neurodegeneration
- Therapeutics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Neurodegeneration**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 29th, 2016
Publication Date	November 2016
