

Nanomaterials for Medical Applications

Call for Papers

In recent years, nanomaterials have emerged as important players in the field of medicine due to their unique properties. The benefits of nanoparticles to modern medicine are numerous. Indeed, there are some instances where nanoparticles enable analyses and therapies that simply cannot be performed otherwise. The applications of nanoparticles in medicine include in the form of drug nanocarriers, imaging contrast agents, implants, and other applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Nanomaterials for Medical Applications**. Potential topics include, but are not limited to:

- Synthesis of Nanoparticles
- Nanomaterials in Therapies
- Nanoparticles in Bioimaging
- Nanocarriers as Drug Delivery Systems
- Nanobiosensors for Clinical Diagnostics
- Nanotoxicology and Remediation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Nanomaterials for Medical Applications**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 30th, 2015
Publication Date	January 2016

Guest Editor:

Prof. Yarub Al-Douri
University Malaysia Perlis, Malaysia
