

Special Issue on Nanofibers

Call for Papers

Nanofibers are an exciting new class of material exhibit special properties of high surface area and unique pore structure. Special properties of nanofibers make them suitable for a wide range of applications from medical to consumer products and industrial to high-tech applications for aerospace, capacitors, transistors, drug delivery systems, battery separators, energy storage, fuel cells, and information technology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Nanofibers**. Potential topics include, but are not limited to:

- Cellulose nanofibers
- Bioactive nanofibers
- Electroactive nanofibers
- Nanocomposite fibers
- Carbon nanofibers
- Polymeric nanofibers
- Functionalization of nanofibers
- Nanofiber seeding polymerization
- Synthesis and characterization of nanofibers
- Modeling and simulation of nanofibers
- Nanofiber technology
- Thermal analysis of the nanofibers

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Nanofibers**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 25th, 2016
Publication Date	July 2016

Scientific Research
Open Access

**World Journal of Nano Science
and Engineering**
ISSN Online: 2161-4962
